Argus AI Ecosystem™

The Argus AI Ecosystem delivers a seamless, intelligent workflow for endoscopy teams.

AI THAT REDUCES PROVIDER BURNOUT

✓ Spend Less Time Reviewing Patient Charts

✓ AI Trained to Lock onto Your Voice

✓ Generate Detailed Reports Accompanied by Real-Time Image Capture & Management

EndoSpeech™

◉Argus®

Verbalization Software

AI-Intelligent Report Writer

Real-Time Data Capture with AI

Natural Language Processing (NLP)

EndoSpeech™, allows physicians to capture their spoken words in real time, during procedures. Using voice profiles, EndoSpeech™ can filter out background speech and understand complex medical terminology.

✓ High Quality Transcripts

✓ Noise Canceling for Background Conversations

✓ User Profiles are Stored and Easily Swapped

✓ Specialty & Language Agnostic

Argus® intelligent report writer uses the EndoSpeech™ transcription to create structured and contextualized data which returns a complete detailed procedure report, saving time after ever procedure.

✓ Use Your Voice to Capture & Labels Images

✓ Automatically Timestamp Images & Landmarks

✓ Voice Activated Label Printing for Pathology

✓ Parse and Organize Procedure Documentation Information
