

ELECTRONIC NURSING RECORD

EndoVault® ENR® turns data into documentation with ease. From patient history to procedure reports to vital sign monitoring and scheduling, EndoVault streamlines workflow and increases efficiency. Interface directly with your EHR to create your most complete documentation.

SEAMLESS EFFICIENCY

For a multi-disciplinary approach to documentation and image management. Eliminate the need for duplicate documentation, information flows easily and fills all required fields simultaneously. Integration with point of care devices reduces errors and saves time by automatically collecting vital sign information.

- ✓ EndoVault® 3.2 is a 2015 Edition ONC Health IT Certified Electronic Health Record application
- ✓ Accurate Charge Capture
- ✓ Automatic Label Printing for Pathology
- ✓ Lab Requisition Autogeneration
- ✓ Integration Directly with EHR, PACS & HIS
- ✓ SGNA & AORN Compliant Dataset
- ✓ Point of Care Interfacing
- ✓ Multi-Lingual Discharge Instructions

REPORTING

- ✓ Over 150 Pre-Built Reports
- ✓ Increased Revenue Recognition
- ✓ Generate Operational, Productivity and Quality Reports
- ✓ Customizable Template System
- ✓ Patient Satisfaction Reporting

ENDOVAULT® ELECTRONIC NURSING RECORD

1

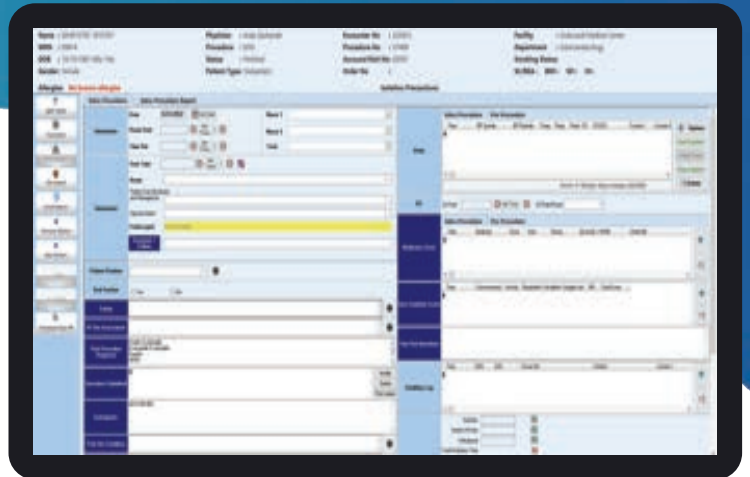

AUTOMATIC VITAL SIGN RECORDING

Record and monitor patient vital signs automatically throughout the procedure process.

2

PATIENT TRACKING

Monitor waiting areas, exam rooms, procedure rooms and recovery bed, efficiently, improving patient satisfaction and productivity.

INTRA-PROCEDURE EVALUATION

3

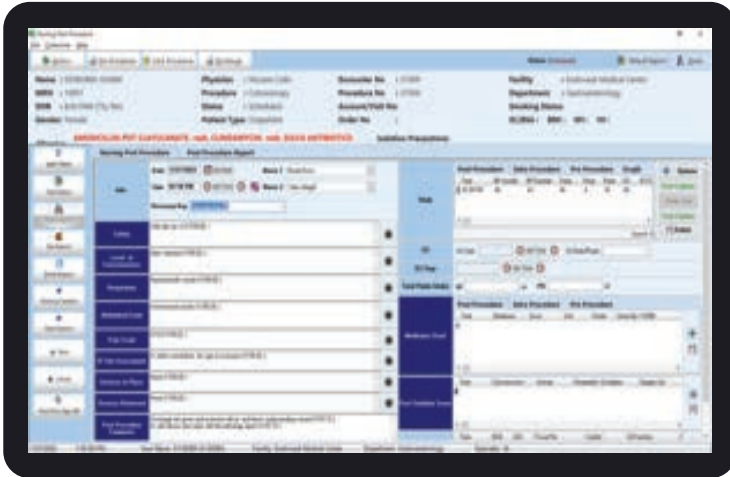

INVENTORY MANAGEMENT

Track time and materials for each patient's stay simply with use of the RFID/Barcode compliant scanning system or choosing from pre-populated picklists.

4

COMPLETE EHR

Keep your patient's health record complete by turning their data into documentation that directly interfaces with HL7 compliant EHRs.

POST-PROCEDURE EVALUATION

5

TIME & MATERIAL BILLING

Reduce inefficiencies and keep the patient first with automatic time management tracking.

6

MEDICAL RECONCILIATION

With direct integration to your EHR, the chance of medication errors is greatly decreased, improving overall patient safety.
